## DIN EN ISO 14001

Dear Customer,

In the course of the introduction of DIN EN ISO 45001, it was decided on management level to merge the certification together with DIN EN ISO 14001.

As a result, the RE-Certification of ISO 14001 (originally planned for May/June 2022) was postponed to November 2022. Nevertheless, the Environment System Standard of ISO 14001 is strictly followed during this transition period.

If you have an automatic reminder system or supplier evaluation system, we kindly ask you to postpone the due date to January 2023 as the issuance of the certificates by the certification body might take some additional weeks.

Thank you for your understanding regarding the further development of our Integrated Management System.
